Excerpts from Thomas Bowie's diary provides us an opportunity to explore the culture of "Southern honor" in the antebellum. Bowie was a teenager when he wrote this diary and he was clearly anxious about his position in society. Throughout this diary, Bowie recorded his attempts to assert himself in all social settings: challenging authority figures, courting women, and fighting with his peers. Bowie wanted to be "No. 1." Through this diary, we can see a young man from an elite Southern family attempting to establish himself as a man of "honor."

Honor was more than a man's reputation; it was the measure of his worth to his family and community. It was not assumed that all elite men had honor; it was something a man had to prove to his community by his actions.

The honor code of the South was a variation of ideas about manliness that dated back to seventeenth- and eighteenth-century Europe. In the U.S. South, this code of honor was modified and used by elite whites to justify their position of power in a slave society.

Elite whites believed that only they had honor, and that they therefore had a duty to protect and govern blacks who were enslaved and poor whites who were inferior. It was also left up to men to protect female relatives from the insults of poor whites, dishonorable elite whites, and African Americans. This code of honor, therefore, not only justified slavery, but also justified the limited opportunities of elite Southern women because it justified keeping them in the home and focused on family life.
