^[3]The General Assembly of 1971 designated the Channel Bass (Red Drum) as the official State Salt Water Fish. (*Session Laws*, 1971, c. 274).

Selection as the State Salt Water Fish

The bill was sponsored by Rep. Howard Penton, D-New Hanover County, and Rep. George Rountree, R-New Hanover County. A newspaper article at the time pointed out the Channel Bass has black spots on its tail, evoking North Carolina's "[tar heel](#)" ^[4] nickname.

About the Channel Bass

Channel Bass (*Sciaenops ocellatus*) are usually found in large numbers along the Tar Heel coastal waters, and have been found to weigh up to 75 pounds--although most large ones average between 30 and 40 pounds.

Channel Bass are found in coastal and estuarine waters from Massachusetts to Key West, Florida, and along the coast of Texas in the Gulf of Mexico. In North Carolina, the fish have historically been important for both commercial and recreational fishing. And North Carolina has been known for producing trophy-sized fish

Beginning in the 1980s and through the 1990s, populations of the fish in North Carolina were in serious decline from over-fishing of young and juvenile fish, prohibiting the growth of larger adult specimens. In 1998 the North Carolina Marine Fisheries Commission instituted quantity and catch size regulations to protect the Red Drum.

North Carolina Session Laws

Session Laws, 1971, c. 274:

H. B. 655 CHAPTER 274

AN ACT DESIGNATING THE CHANNEL BASS (RED DRUM) AS THE OFFICIAL STATE SALT WATER FISH.

The General Assembly of North Carolina do enact:

Section 1. Chapter 145 of the General Statutes is hereby amended by adding a new section at the end thereof, to be designated as G.S. 145-6, and to read as follows:

"§ 145-6. *Official State salt water fish.*—The Channel Bass (Red Drum) is hereby adopted as the official State salt water fish of the State of North Carolina."

Sec. 2. This act shall become effective upon ratification.

In the General Assembly read three times and ratified, this the 30th day of April, 1971.
