

## Atlanta in ruins, circa 1864

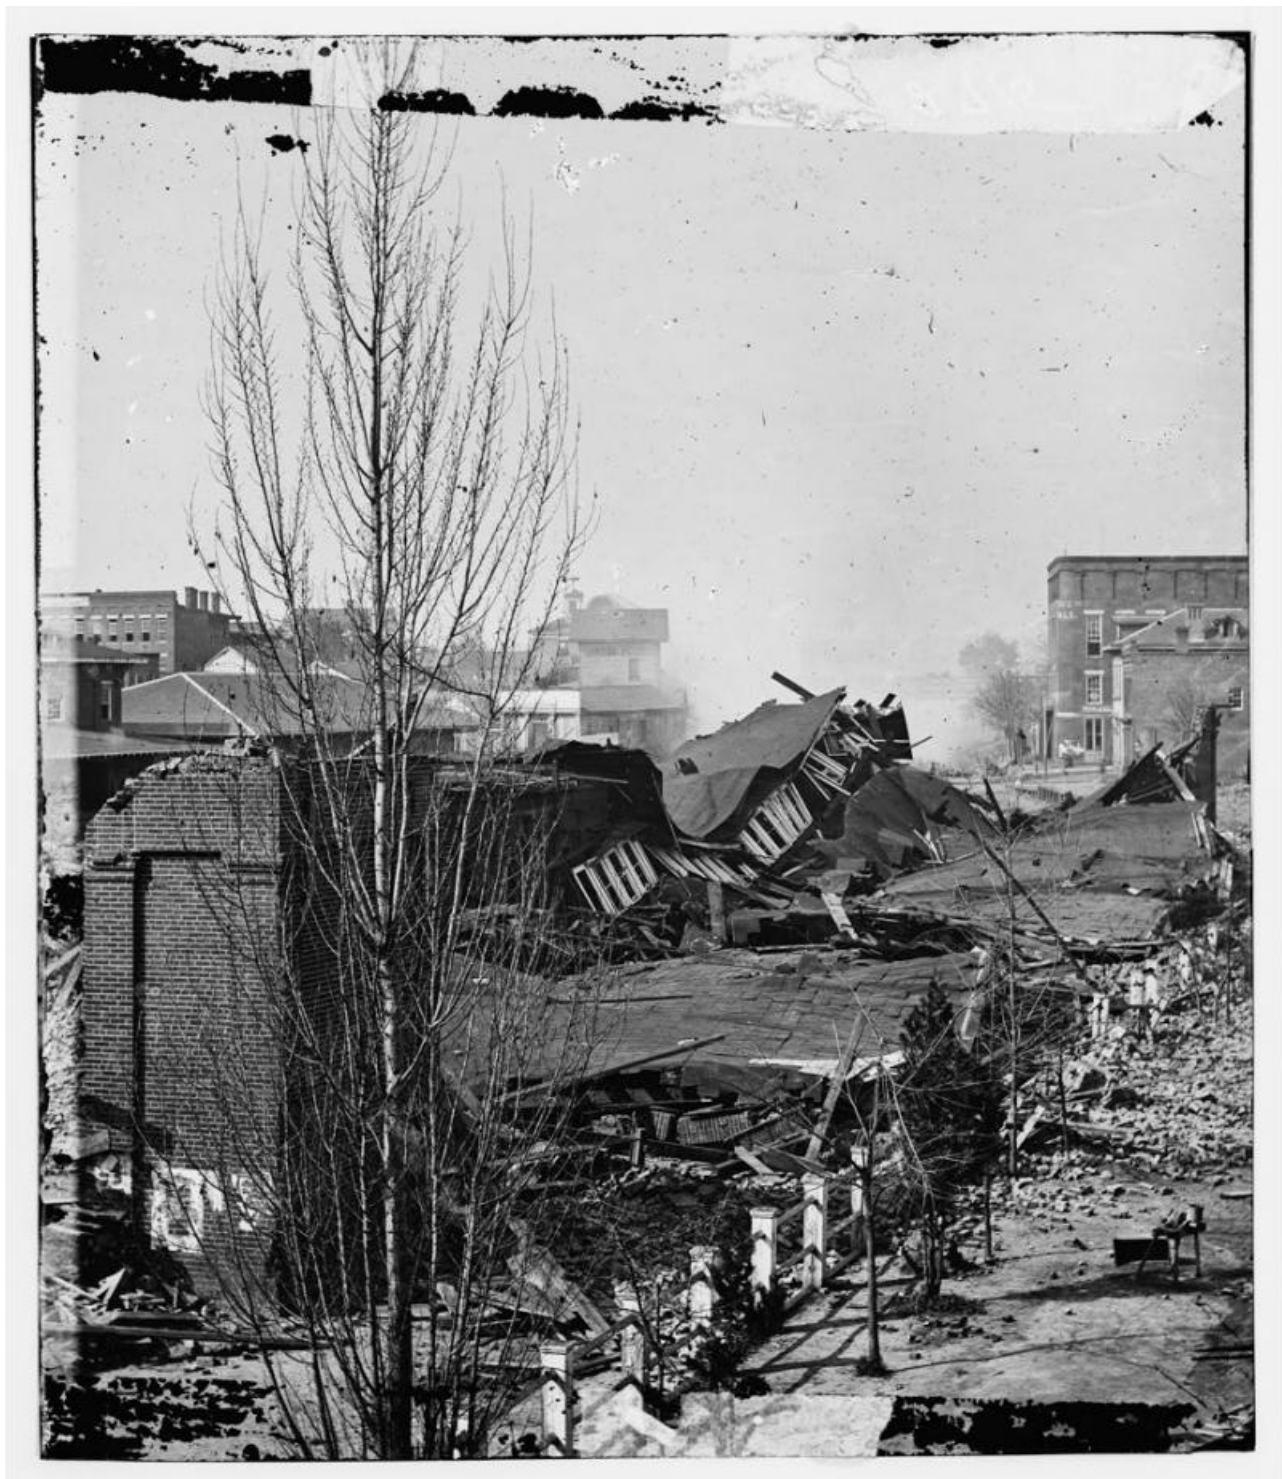

### Atlanta in Ruins, Circa 1864

Depicted are the ruins of a depot that was blown up on Sherman's departure. The destruction was part of Sherman's March, also known as the Georgia and Carolinas Campaigns, which lasted 1864-1865. Sherman and his troops started in Georgia, then made their way up to North Carolina. The march consisted of burning farms and plantations; destroying railroads, buildings, and sometimes homes; and freeing enslaved Black people.

## Public Domain

Public Domain is a copyright term that is often used when talking about copyright for creative works. Under U.S. copyright law, individual items that are in the public domain are items that are no longer protected by copyright law. This means that you do not need to request permission to re-use, re-publish or even change a copy of the item. Items enter the public domain under U.S. copyright law for a number of reasons: the original copyright may have expired; the item was created by the U.S. Federal Government or other governmental entity that views the things it creates as in the public domain; the work was never protected by copyright for some other reason related to how it was produced (for example, it was a speech that wasn't written down or recorded); or the work doesn't have enough originality to make it eligible for copyright protection.
