GEOGRAPHIC INFORMATION

REGION: Mountain
RIVER BASIN: French Broad, Map
NEIGHBORING COUNTIES: Avery, McDowell, Yancey

Mitchell County, located in the Mountain region of western North Carolina, was formed in 1861 from Yancey, Watauga, Caldwell, Burke, and McDowell Counties; it was named for University of North Carolina professor Elisha Mitchell, who died exploring the famous mountain peak in western North Carolina that now bears his name (Mount Mitchell, Yancey County). Mitchell County partially borders the state of Tennessee. Early inhabitants of the area included the Cherokee Indians, followed by German and Scotch-Irish settlers. The county seat, Bakersville, was incorporated in 1868, although it had been established for more than 10 years prior to that time. The town was named for David Baker, who received a land grant and settled in the area in 1797. Other Mitchell County communities include Spruce Pine, Bandana, Red Hill, Penland, and Poplar. The acreage of Mitchell County comprises a large section of the Pisgah National Forest. Notable physical features include the North Toe River, Big Yellow Mountain, Chalk Mountain, and Roan Mountain.

Mitchell County's Penland School of Crafts, established in 1929, is one of America's oldest and most successful handicraft schools. Other historic places include the English Inn, dating from the early nineteenth century, and the Lunday footbridge, constructed in the midtwentieth century. Mitchell County cultural institutions include the North Carolina Mineral Museum and Twisted Laurel Gallery. Popular annual events held in the county include the Rhododendron Festival, Fall Festival of the Arts, Music in the Mountains Folk Festival, and North Carolina Mineral and Gem Festival at Spruce Pine.

Mitchell County has one of the richest mineral deposits in the United States. Fifty-seven different minerals are mined there, including mica, emerald, aquamarine, quartz, garnet, sapphire, kaolin, and feldspar. The county's agricultural products include burley tobacco, horticultural crops, Christmas trees, and beef cattle, and its leading manufacture is furniture. Mitchell County's estimated population was 16,000 in 2004.
