

Name _____

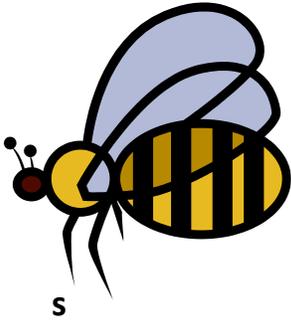

Flowers and Pollination

Using the “What is it?” column from the Mini Page, figure out which word from the word bank matches each definition.

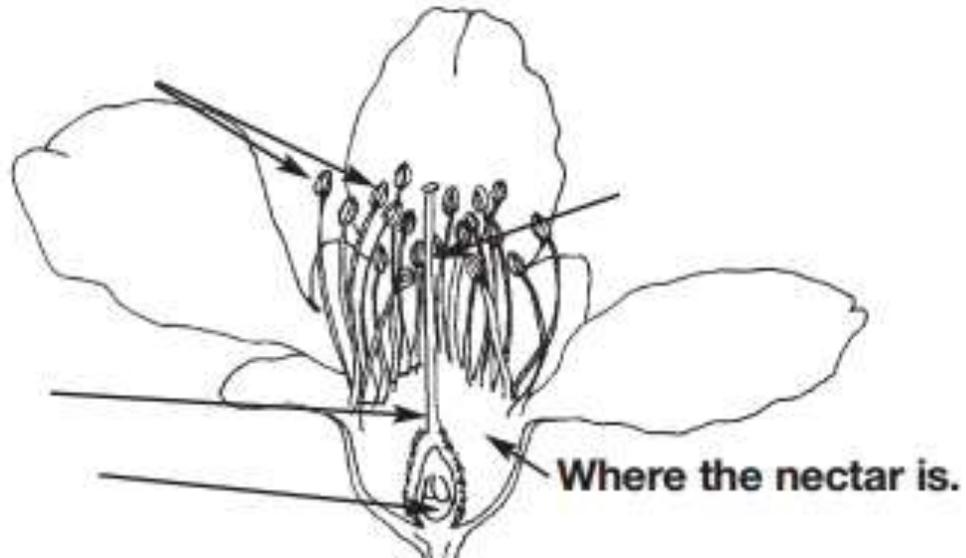

Anthers	Stigma	Style
Ovary	Pollen	Fertilization

1. _____ place in the flower where seeds are made
2. _____ female part of the flower
3. _____ small particles on the anthers that are needed to make seeds
4. _____ male parts of the flower
5. _____ the process where the pollen enters the ovary to make seeds
6. _____ a long tube that leads to the ovary on the female part of the flower

1. Next, label the parts of the flower using these words: **anther**, **style**, **ovary**, **stigma**.

2. Then, draw a circle around the place on the flower where you find pollen.

3. Draw a line from the bee to the place on the flower where the pollen needs to go.

Name Answer Key

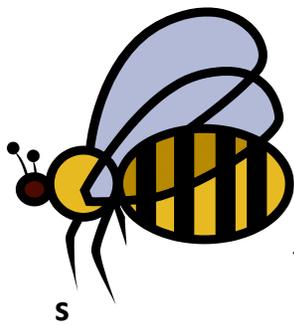

Flowers and Pollination

Using the “What is it?” column from the Mini Page, figure out which word from the word bank matches each definition.

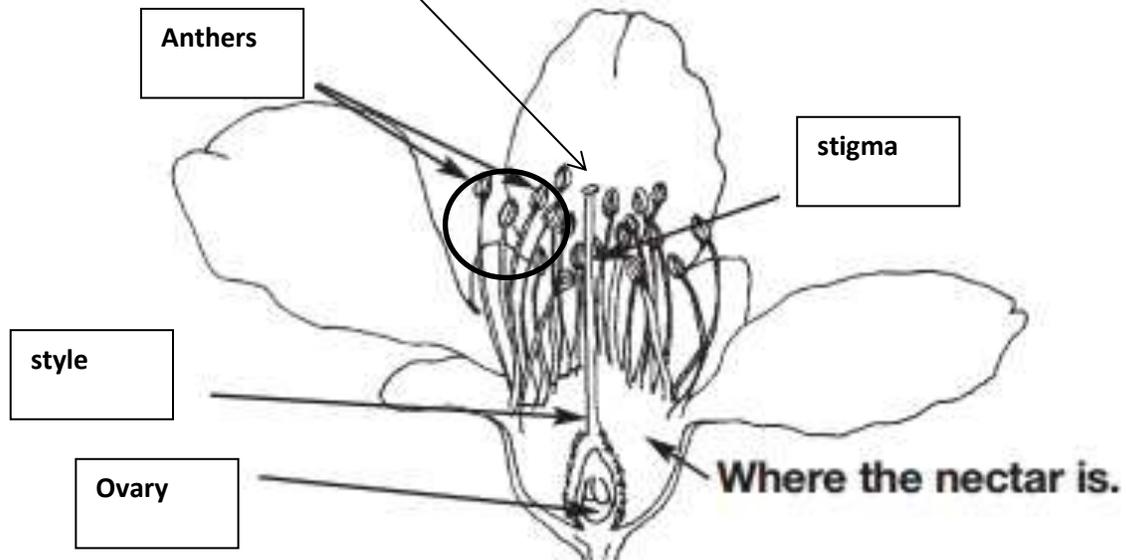

Anthers	Stigma	Style
Ovary	Pollen	Fertilization

1. _____ **Ovary** _____ place in the flower where seeds are made
2. _____ **Stigma** _____ female part of the flower
3. _____ **Pollen** _____ small particles on the anthers that are needed to make seeds
4. _____ **Anthers** _____ male parts of the flower
5. _____ **Fertilization** _____ the process where the pollen enters the ovary to make seeds
6. _____ **Style** _____ a long tube that leads to the ovary on the female part of the flower

1. Next, label the parts of the flower using these words: **anthers**, **style**, **ovary**, **stigma**.

2. Then, draw a circle around the place on the flower where you find pollen.

The circle should be drawn around the top of the anthers

3. Draw a line from the bee to the place on the flower where the pollen needs to go.

The line should go to the stigma; some students may draw a line first to an anther then to the stigma
